

THEY ARE HERE!

In the late afternoon of April 22, 2006 the cylindrical shaped extraterrestrial spacecraft was photographed over my home by my friend and colleague of more than 20 years Tim Robinson.

The eye witnesses state the low flying craft was about the size of large bus and was moving very slow.

April 22, 2006 Dolan Springs, Arizona

The photo was taken just as the vehicle emitted two pulses of purple colored energy downward, simultaneously from both it ends. With this action the craft increased its speed and rapidly left the area.

The craft is shown again below extremely enlarged. The pulses of energy emitted from its ends are therefore more pronounced. The faint dark areas that are equally spaced along its length appear to be square windows.

The hemispheric shaped ends appear to be actually two small saucer craft that are attached. On the right end there is a vertical line delineating the cylinder shaped vehicle from its attached saucer.

OLDIE BUT GOODIE

The following is a cylindrical spacecraft inscribed on a ceremonial seal. This seal is found in the National Anthropological Museum, in Mexico City.

I believe that the craft found in our photograph is of the type found on this ancient seal.

Notice on the seal that the supposed spacecraft's ends both depict dragons biting their own tails. This represents the craft's propulsion system.

Since this picture was taken Tim Robinson has taken literally thousands of photographs of extraterrestrial spacecraft as they fly about in the skies over Dolan Springs, Arizona.

The craft above has been photographed several times more, along with amazing hollographic images that it projects.

Tim is preparing a book of these photographs that will be titled "Signs and Wonders."

They are here!
