

## **SIGNS AND WONDERS**

**On the 13 of August 2006 the extremely large extraterrestrial spacecraft estimated to have a diameter of approximately one mile was photographed by Ra Team Member Tim Robinson in the skies over Dolan Springs, Arizona.**

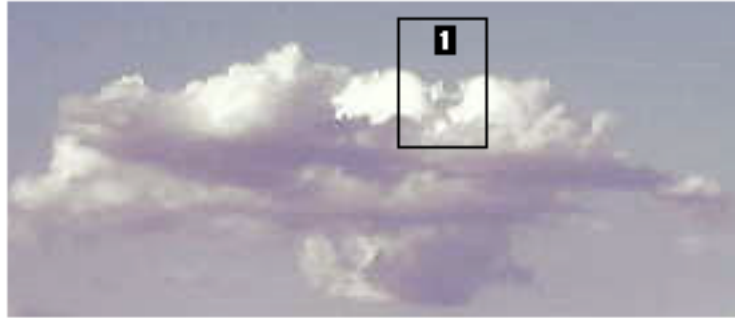

**Enlarge this document to maximum PDF size.**

**Tim snapped the picture as a vast cloud was rapidly forming around the craft. It is not known if the formation of the cloud was a natural phenomenon, or if the cloud was produced by the craft's operators.**

**Copyright © 2006 Tim Robinson. All rights reserved**

**Features that will be discussed are numbered in the cropped copies of the same picture below.**

**Feature 1: © copyright applies.**

**Fortunately a part of the ship was not yet covered by the cloud when the picture was taken. The key feature (1) is a solid protrusion that has a rectangular cross-section, which is clearly seen.**

**The feature appears to be either a gigantic periscope, projector, observation deck , or maybe a weapon. Look closely, this box like feature is attached to the craft by a pole.**

**There can be no doubt that this protruding feature and the immense craft it is attached to was designed and manufactured by intelligent beings.**

**Because this feature (1) was clear enough to be identified as being manufactured we studied the picture to a greater degree. Otherwise this terrific photo would have been set aside.**

**Feature 2: © copyright applies.**

**In the left center of the i.d. window can be seen a double row of dark squares. These could be viewing ports, or maybe vents.**

**Feature 3: © copyright applies.**

**The feature in i.d. window 3 appears to be similar to an Earth type building. There are four tiers centered by a dome.**

**Feature 4: © copyright applies.**

**The feature in i.d. window 4 appears to be another building consisting of two stories. Look closely. There is a line of purple colored spheres hovering over this feature.**

**Photo enlargements of this photograph will be produced, as enlarging the origin digital picture blurs its contents.**

**Tim Robinson**

**Tim Robinson has photographed thousands of UFO photos over Dolan Spring, Arizona since April, 2006. Many of these photos contain drones.**

**Tim is preparing a book of these photographs that will be titled “Signs and Wonders.”**

**Much more to come.**

**They are here!**

## **ANSWERING THE EXTRATERRESTRIALS**

**Our on going research and interpretations of the nine Extraterrestrials radio messages have inspired a “legal” way to physically answer the ETs using a unique piece of computer programed optical equipment. The computer program is designed on the Ra System of Mathemathics and data found in the work of Dr. Bruce Cornet (Cornet Signal). Dr. Cornet was once the Deputy Director of the National Institute of Discovery Science (NIDS). This equipment is on the drawing board and will be constructed soon.**

**Watch for the articles: The Cornet Signal and Project Echo, for further details.**

**See cover page that follows:**
