

## **MESSAGE IN THE SKY**

**On August 25, 2006 a large cylindrical extraterrestrial spacecraft was photographed in the sky over Dolan Springs, Arizona.**

**At the time it was photographed the ET craft emitted from one of its ends a series of cloud formations in the shape of letters from the alphabet. This procedure is similar to “sky writing.”**

**Assuming that the extraterrestrials knew that the 81 tones they used to produce their nine radio messages of 1995 had been assigned letters, and symbols found on the standard computer keyboard, we translated the “cloud letters” to the same numerical values that we of the Ra Research Society perviously found applied to any particular pitch of the various tones that composed the ET radio messages.**

**Because we have no evidence that anyone at our geological location in the sparsely populated Mohave Desert is attempting to translate the nine ET radio messages of 1995, or is constantly photographing the ET aerial activities in the area, we must conclude that the message in the sky was intended for us.**

**The extraterrestrials have thus added another way (of many ways) of informing us that they want us to understand and employ the Ra System of Mathematics in our lives.**

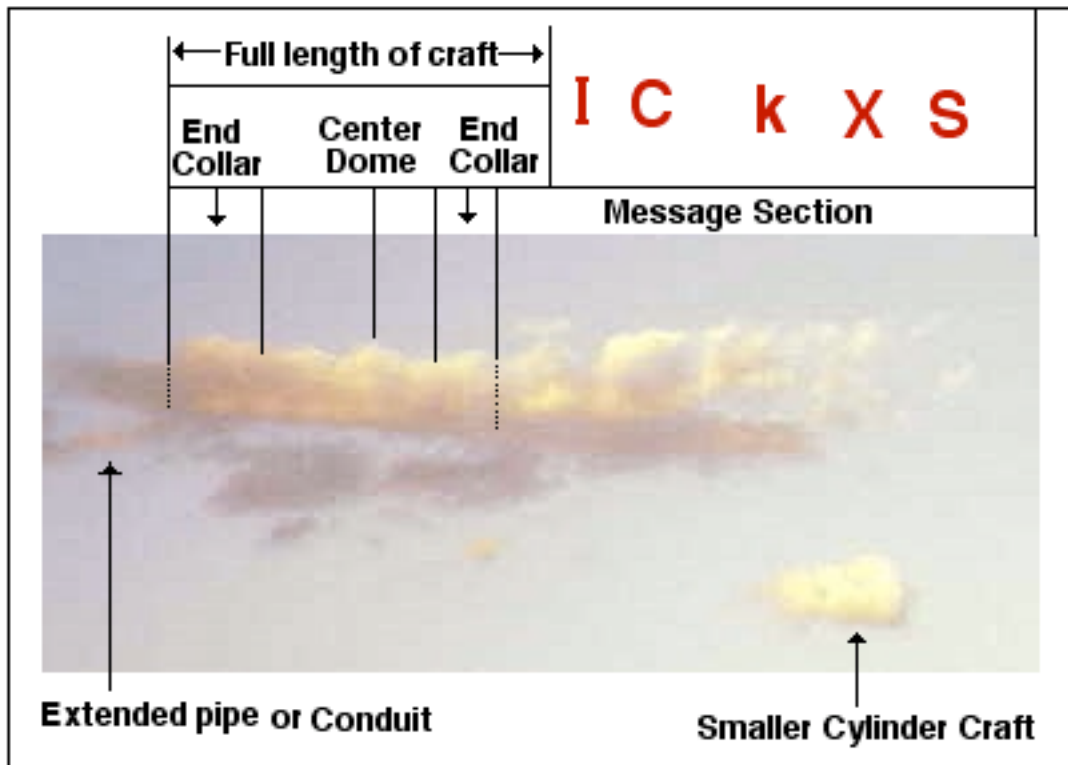

**Copyright © 2006 by Tim Robinson**

**The extraterrestrial spacecraft shown above could have been easily mistaken as a cloud. But analysis of more than 11,000 photographs taken over Dolan Springs, Arizona since April 22, 2006 has sharpened our ability to pick out certain details that might not be noticed by someone only taking a casual glance.**

**All of Tim Robinson's photographs were taken with an Olympus digital voice recorder with a W-10 .3 mega pixel camera.**

**The part of the image shown in the picture that pertains to the actual solid three dimensional ET spacecraft is shown enlarged below along with our comments,**

Copyright Applies

The best way to describe the ET spacecraft pictured above is to point out its undeniable symmetry.

The identical ends of the cylinder are flared like a musical horn. The ends obviously have bigger diameters than the center section of craft. We also refer to the ends of the cylinder as “collars.”

The center section of the vehicle is itself centered by a dome shaped protrusion on its top.

The right end of the craft was definitely closer to the camera when the photo was taken.

A pipe like extension is seen projecting from the bottom of the left end of the craft.

**Assigning the “cloud letters” the Ra numerical values that we have done in the case of the nine ET radio messages we have been able to translate what the extraterrestrials tried to convey.**

4

ICkXS would appear as **GICkXSG** in the ET radio messages.

We will now look *only* at the Ramathized version (level 3) of this tone group, or cloud letter group:

**I = 243**

**C = 81**

**k = 999.999--- or 1**

**X = 648**

**S = 513**

RA TABLE OF NINES							
1	.027	10	.270	19	.513	28	.756
2	.054	11	.297	20	.540	29	.783
3	.081	12	.324	21	.567	30	.810
4	.108	13	.351	22	.594	31	.837
5	.135	14	.378	23	.621	32	.864
6	.162	15	.405	24	.648	33	.891
7	.189	16	.432	25	.675	34	.918
8	.216	17	.459	26	.702	35	.945
9	.243	18	.486	27	.729	36	.972
				37	.999		

### Partial Translation Level 3:

1) 243 ( **I** ) x 81 ( **C** ) = 19,683, or 162. ( **phi** ) x 121.5  
 (wavelength of the Lyman m2 spectral line of hydrogen...most intense line in the ultra violet ).

LYMAN SERIES ULTRA VIOLET $1/\Delta = R(1/1^2 - 1/M^2)$ RESULTS STATED IN GREEN ANGSTROMS	
M VALUES	WAVE LENGTH ( $\Delta$ )
M = 2 _____	1215. <u>Most intense line</u>
M = 3 _____	1025.15625
M = 4 _____	972.
M = 5 _____	949.2187503
M = 6 _____	932.7857142
M = 7 _____	930.2343375
M = 8 _____	925.7142854

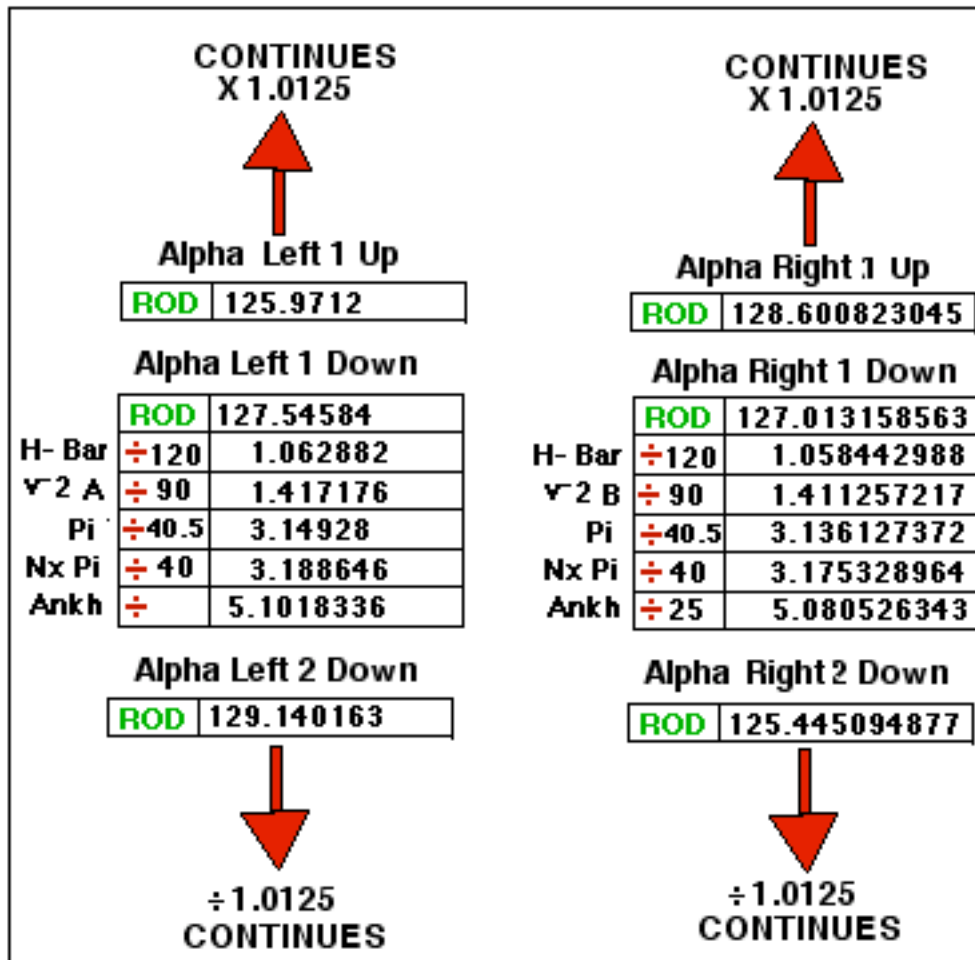

2) Cloud symbol “k” is neutral on level 3 only.

3) 243 ( **I** ) x 81( **C** ) x 648 ( **X** ) = 12,754,584 ( **Alpha left 1 down rod is 127.54584** ).

*ET use of tone “S” ( 513) is still under investigation. There is a debate whether the supposed fading letter is or is not an “S” or was instead a “G” meaning an end to the “phrase,” or a “failed to form “X.”*

-----

## THE ALPHA 1 DOWN ROD PAIR

NOTE:

Rod Left x Rod Right = 16,200 (Phi x 10,000).  
 Sq. root 2 A x sq. root 2 B = 2.  
 Left Pi x Right Pi = 9.87654321 (green pi squared).  
 Next Pi Left x Next Pi Right = 1.0125 (reciprocal of green Pi).  
 Ankh Left x Ankh Right = 25.92 ... See Barbury Crop Formation: Splendor in the Grass.  
 Ankh of any format ÷ by 1.62 (Phi) will equal the Pi of that particular format.

**Evidence abounds that the Ra System of Mathematics has been used in the following constructions and during certain ET activities.**

**1) Ruined buildings and pyramid found at Cydonia on the planet Mars.**

**2) The Great Pyramid plus the Second and Third largest pyramids at Giza, Egypt.**

**3) Stonehenge, England.**

**4) The Pre Colombian cities of Teotihuacan, and Palenque, Mexico.**

**5) At least in the design and creation of the Barbury Castle Crop Formation of July, 1991 in England.**

**5) The Cornet Signal (Ra encoded flashing lights).**

**6) Nine ET radio messages of 1995.**

**7) Sky writing over Dolan Springs in 2006.**

**Thank you for the time and kind attention you have given to reading this article.**
