CORNET SIGNAL

**Dr. Bruce Cornet, AOP Researcher, Geologist,
Paleobotanilynologist**

One of the most valuable pieces of evidence that supports the fact that the nine ET radio messages of 1995 originated from an extraterrestrial source, comes to us in the form of an event that occurred on 10 August 1997. The place was Sea Bright, NJ. The time was just after sunset. It was on this date and at this time that Dr. Bruce Cornet was present and had the good fortune to have in his possession a video camera.

Looking eastward over the Atlantic Ocean at airliners that were en route to Kennedy airport in New York City, Dr. Cornet noticed another type of aircraft which in his opinion was not an airliner. This craft moved slowly and suddenly turned on two very bright white lights which were located opposite to each other on the dark body of the craft. As this vehicle began to move in his direction he noticed that the white lights were centered by a red light. These three lights then began to pulse like strobes, but not in any preset order.

Because the light pulses were not happening in a preset order as strobes would do on a conventional aircraft Dr. Cornet began to video the approaching UFO.

Dr. Cornet reported: “As incredible as this may sound, the pilot wanted to present the belly of the craft towards the camera so that the pattern of strobes would be accurately recorded.”

Dr. Cornet also reported that: “The light signal pattern of the 10 October 1997 UFO contains an intricate interplay between a red light and two white lights, which flashed in discrete patterns to produce clusters of flashes separated by intervals of no flashes. In addition, the spacing (number of video frames) between flashes was synchronized to Cornet's video speed, such that the red strobe alternately fired every 29 and 88 frames. And yet at key points in the sequence the interval between red strobes was 59 frames (the difference between 29 and 88). Based on the types of clustering and alternation of signals, the pattern appears to have been deliberate and under intelligent control. There also appeared to be mathematical progressions in parts of the sequence.”

The reader can be better informed of Dr. Cornet's experience and analysis of his video by visiting his web sites at:

bcornet@monmouth.com

and

<http://www.monmouth.com/~bcornet>

On April 27, 2004 Rod C. Davis personally delivered some of our translated ET message material to the National Institute of Discovery Science (NIDS) in Las Vegas, Nevada. Several days after the material was delivered to NIDS I was contacted by e-mail by Dr. Bruce Cornet who was at the time the Deputy Director of NIDS. Dr. Cornet invited me to visit his web sites and familiarize myself with the information pertaining to what later came to be called the "Cornet Signal."

Within days of Dr. Cornet's e-mail to me, he was dismissed from his position at NIDS.

After studying the light sequences I was pleased to learn that the Extraterrestrials employed the use of the Ra System of Mathematics to send a personal message to Dr. Cornet by the means of flashing lights. The original 9 ET messages were received prior to January, 31, 1995 and the Cornet Signal was received on August, 10, 1997 (more than two years later).

I have chosen this point in this writing to inform the reader of the Cornet Signal because the reader has been informed of the values of the omega left and omega right 1 up rod formats (in previous articles). It will be seen shortly that these rod formats are clearly referred to by the "104-105 event of light flashes" found in the Cornet Signal.

Cornet Signal and the Ra System

The information found in the Cornet Signal was presented as white flashes of light that occurred at varying time rates between 2 red flashes.

We have found that there were 105 of these flashes recorded. So there are 105 events to deal with.

Each red flash has been numbered in sequence, as per its time of appearance. i.e.. Red flash 1, Red flash 2, Red flash 3-- on up to Red flash 105.

This type of identification allows for a particular body of data to be easily found and isolated for study. The data body as you know is found in the video frame record, which could amount to either 29-59-88- or 117 video frames. The frame record just mentioned was given by Dr. Cornet. It is my present position that the frame record is most likely in every case multiples of 29 frames (camera speed is actually 30 frames per second) so the record would be 29 (ok), 58 (not 59), 87 (not 88) and 116 (not 117).

For the sake of this explanation, we have chosen the event that occurred between Red flashes 104 and 105 to illustrate. It is the last event of the signal, and it has only 29 frames of data.

=====

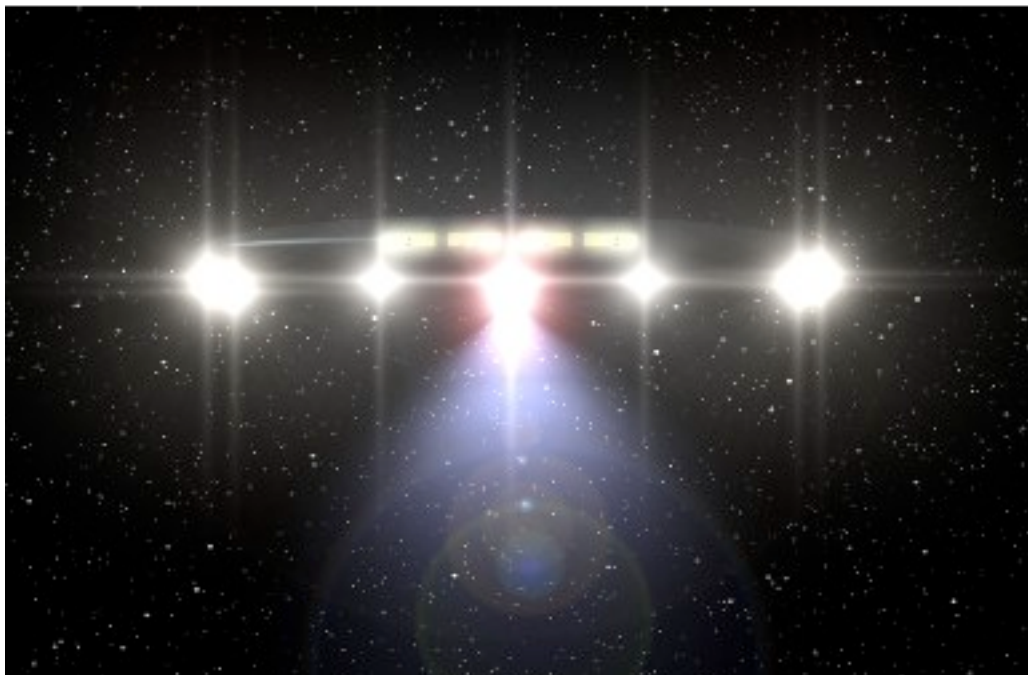

Dr Cornet... quote: "The unusual pattern was recorded for 2 minutes and 23 seconds."

Ra Team: 2 minutes and 23 seconds = 143 seconds.

143 standard seconds ÷ 29 frames = 4.931034483 standard seconds.

Note: 4.938271605 *natural seconds* is the length of track 1 tone time unit for the 9 E.T. messages we are presently working on .

In other words when the camera was operating it was clicking off 10 E.T. 1 time units for every 290. video frames over a running time period of 143.2m09876543 natural seconds, or 143.110802938 standard seconds. This is only about 1/10 of a standard second greater than Dr. Cornet's estimate for the total time that elapsed between event 1 to event 105. See the following. ----->

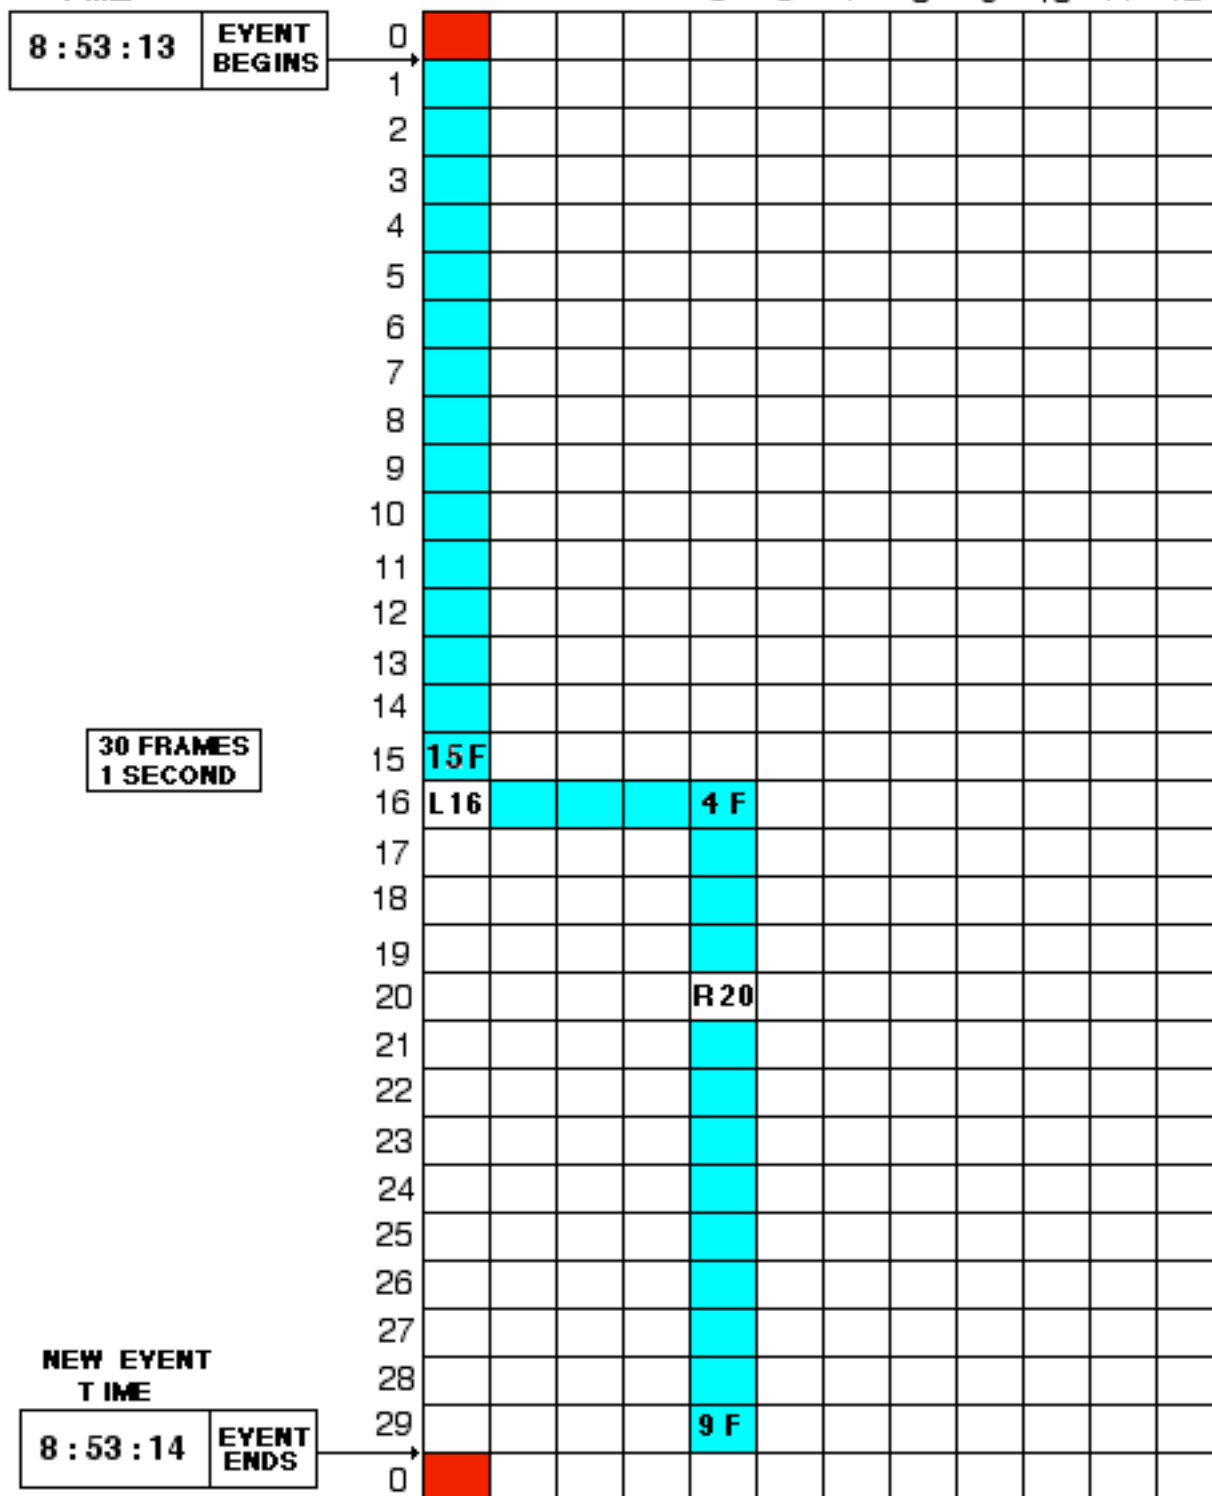

EYENT:104

PULSE:104 TO 105

FRAME:

**EYENT
TIME**

DATA BODY: 29 FRAMES

PROCEDURES

After 1 red flash fifteen frames are spent before a left white strobe flash occurs in frame 16.

1) $16 \text{ (left)} \div 15 \text{ spent frames} = \underline{1.06666666\text{---}}$ See omega right H-bar 1-up in chart described below.

The next white strobe flash occurs after 3 spent frames, 4 counting the flash in frame 20 R.

2) $16 \text{ L} \times 20 \text{ R} = \underline{320}$. See omega right next pi (3.2) 1-up in chart described below.

3) Or— $16 \text{ L} \times 4 \text{ spent frames} = 64 \times 20 \text{ R} = \underline{1,280}$. See omega right Rod 1-up in chart described below.

There are 9 spent frames from 20 R to the end of the data body thus:

4) $\underline{1,280} \div 9 = \underline{142.222222\text{---}}$ See omega right “right-part” of sq. root of 2— 1-up in chart described below.

5) $20 \text{ R} \div 9 = \underline{2.222222\text{---}}$ (reptan 6) which is also the square root of- 4.938271605 (E.T. time unit 1... in natural seconds).

6-- All Frames x

6) $15 \text{ spent frames} \times 16 \text{ Left} = 240 \times 4 \text{ spent frames} = 96 \times 20 \text{ Right} = 19,200$. See circumference of E.T. circle and sphere. In E.T. message 1, section 3 interpretation. And $19,200 \times 9 \text{ spent frames} = 172,800$. See electron charge to mass constant.

Compare the results of 5 procedures above to chart below

Omega Left 1-up			Omega Right 1-up		
R = Rod	ROD	126.5625	R = Rod	ROD	128.
R/ 120	H-bar	1.0546875	R/ 120	H-bar	1.0666---
R/ 90	A - $\sqrt{2}$	1.40625	R/ 90	B - $\sqrt{2}$	1.4222---
R/ 40	Nx Pi	3.1640625	R/ 40	Nx Pi	3.2
R/40.5	Pi	3.125	R/40.5	Pi	3.160 <u>493827</u>
R/25	ANKH	5.0625	R/25	ANKH	5.12

Note: The rod value for Omega Right 1 up is: 128. See result of “Signal 104 -105” procedure 3.

Note: The H-bar value Omega Right 1 up ($R \div 120$) is 1.0666-- -- See result of “Signal 104-105” procedure 1.

Note: The next pi (nx pi) Omega Right 1 up is 3.2 ($R \div 40$) See result of “Signal 104-105” procedure 2.

Note: The “right part” of the square root of 2 is 1.42222222-- = ($R \div 90$) See result of “Signal 104-105” procedure 4.

Note: Omega Right 1 up pi = 3.160493827 E.T. tone time unit 1 is found in this version of pi.

They certainly get a lot of mileage out of 4 light flashes.

We of the Ra Research Society will continue to apply anything that is learned from the 9 ET radio messages to the total translation of the Coronet Signal.

=====

THE CORNET SIGNAL, SETI and DAVID M. LEVINE

The Cornet Signal originated from a UFO which used the Ra System of Mathematics in the spacing of red and white light flashes in order to convey some sort of message.

UFO and an alien message? The SETI Institute won't want to hear this.

As the reader should be aware that a person named David Levine claimed that he "invented" the 9 ET messages that we say are real and are the basic subject of this writing.

We would certainly like to know what strange and wondrous powers David Levine possesses that enabled him to overwhelmingly influence Dr. Bruce Cornet to go to Sea Bright, NJ. on the night of 10 August 1997 with a video camera in order to video tape a UFO that sent a message by flashing lights in multiple mathematical sequences. That is light sequences, based of the same mathematical system that he (David Levine) would have to of have used to write his nine "fictitious ET messages"? But, its evident that Levine had no idea that the Ra System even existed. So?

I guess Levine and his backers never expected the Extraterrestrials to use other forms of communication such as crop circles and flashing lights to get around their lies and other forms of B.S..

The fact that a valid message from an Extraterrestrial intelligence was was conveyed in the form of flashing lights from a unique aircraft (UFO) within physical sight of witnesses and within the planet's atmosphere presents a very big problem for those who would prefer that any Extraterrestrial message come from many light years away. That is, if such an ET message

came from lets say 30 light years away, then it would take another 30 years to send an answer to the Extraterrestrials telling them that we received their message and of course it would take another 30 years for them to reply to our return message. Mean while funding for whatever organization that is put in charge of both listening for and answering the messages would be secure for at least 60 years. **A UFO sending an intelligent message from within our atmosphere is the last thing they want to hear, or have proven.**

To see a short video clip of the craft observed by Dr. Cornet see :<http://www.jerrypippin.com/index2.htm> and search for the Bruce Cornet interview.

Dear reader, no woo woo channeler, false messiah, or “official representative of the extraterrestrials” can provide you with this information. If you are gaining anything at all from our efforts please let us know.
