

## **Trelba Sye: Carved Heads Left Of Main Door**

**A number of carved heads found at Trelba Sye that are located to the left of the main door are quite eroded, but some are still recognizable.**

**The two carved figures above are gigantic. The one on the left is estimated to be about 30 feet high and the one on the right is estimated to be about 20 feet high (based on the 5' 2" height of the women in the picture).**

**The picture above shows the largest carved figure which to date has been found at Trelba Sye. Its height from its base to its top is about 50 feet.**

**There are several other carved heads that can be found around these features, but these are difficult to make clear.**

**Special note: Chisel marks are still clearly visible on all the Trelba Sye carvings (Those accessible at ground level).**

**Why were these heads carved? The effort must have taken a great deal of time.**

**When was the city actually founded, and how long was it occupied? What artifacts might still exist in this ancient city?**

**The 600,000 B.C.E. dating of the city would presently make it the oldest *known, constructed, human habitat on Earth*.**

**The fact that the city was built underground brings to mind that it was originally ventilated, possibly with numerous ventilation shafts. Theoretically these shafts became clogged when they filled up with molten lava. Our planned ground penetrating radar explorations might reveal these shafts. Hopefully there is at least one of these shafts that can be reopened and thus permit access to the city below.**

**If the city is totally packed with decomposed granite (carried in by water over the millennia) then a full excavation of the place could take decades.**

**There is thought that deals with the possibility that extraterrestrials have been using the city of Trelba Sye in modern times as a base of operations.**

**The extraterrestrials revealed the existence of Trelba Sye to us in November 1963 (43 years ago). We have kept the city's location a secret ever since, in accordance with an agreement we made telepathically with the extraterrestrial visitors those many years ago.**

**They now say that it is time to prove that we of the Ra Team are truly in contact with them. Because of our exclusive knowledge of Trelba Sye our ET contact should be obvious to those that can honestly face the facts.**

**Unlike an ET spacecraft, Trelba Sye can't fly away.**
